

CENSUS REPORT

1958

TRUST TERRITORY

of the

PACIFIC ISLANDS

CENSUS OF THE TRUST TERRITORY OF THE PACIFIC ISLANDS: 1958

The total population of the Trust Territory of the Pacific Islands was 70,724 according to a census conducted by the Office of the High Commissioner during the first half of 1958. This was the first complete enumeration of the population since the area became a trusteeship of the United Nations administered by the United States.

The Territory covers some 2,100 islands scattered over an area approximately the size of continental United States. The total land area for the Territory is 687 square miles and, for the inhabited islands, 660 square miles. Population density for the inhabited islands averages 107 persons per square mile.

Of the seven districts comprising the Territory, Truk is the most populous with a total of 20,124 persons, or an average of 425.5 per square mile. Rota district is the least populous, with a total of 969 persons, or an average of 29.5 per square mile.

The census was planned and supervised by the Staff Anthropologist working under the general direction of the High Commissioner in Agana. Most of the enumerators were schoolteachers who were recruited from their respective districts and trained at Territorial Headquarters. Upon completion of the enumeration, which actually extended from December 1957 to June 1958, the schedules were forwarded to the U.S. Bureau of the Census in Washington for tabulation. Care punching, tabulation, and preparation of the final tables were done at the Bureau of the Census.

Of the total population, 69,449 persons reported that they were born in the Trust Territory and the remaining 1,275 persons either reported that they were born outside the Territory or failed to report place of birth. The population born in the Trust Territory was classified by ethnic group as follows: Chamorro, Dapingamarangi-Nukuoran, Kusaiean, Marshallese, Palauan, Ponapean, Trukese, Ulithi-Woleaian, Yapese, and other. In order of numerical importance, the Trukese ranked first, the Marshallese second; and the Kapingamarangi-Nukuoran last. (See table 4, page 6.) Persons of mixed ethnic stock were classified according to the ethnic group of the mother.

For the population born in the Trust Territory, there were 105.7 males per 100 females. According to table 5, the median age for males born in the Territory was 18.3 years whereas the median age for females born in the Territory was 19.1 years.

Table 10 shows the population 25 years of age and over classified by years of school completed, place of birth, major ethnic group, and sex. Of the population born in the Trust Territory 25 years of age and over, 61 percent reported that they had completed one or more years of school. The remaining 39 percent either had completed no years of school or failed to report the number of years completed.

According to table 12, approximately one-fourth of the population five years of age and over and able to speak and read English. In the age group 15 to 24 years old, 56 percent reported that they could speak English and 60 percent reported that they could read English.

As shown in table 16, the average number of persons per private household was 6.4 for the Territory. In Truk district, however, the average number of persons per household was 7.3, and in Yap district the average was only 3.9.

These and other data for the Trust Territory of the Pacific Islands and shown in tables 1 to 16 which follow.

Table 1. Population of the Turst Territory of the Pacific Islands: 1925 to 1958
 [Minus sign (-) denotes decrease]

Year	Land area in square miles	Population	
		Total	Per square
1958	70,724	6,732	10.5
1955	63,992	9,149	16.7
1950	54,843	-80,865	-59.6
1940	135,708	37,143	37.7
1935	98,565	28,939	41.6
1930	69,626	13,332	23.7
1925	56,294

Notes: 1955 from US Department of the Interior, 1955 Annual Report on the TTPI; 1950 from US Navy;
 large numebrs of Japanese repatriated to Japan as result of World War II; 1925 to 1935
