INTRODUCTION

The Bulletin of Statistics is prepared by the Statistics Division of the Office of Planning and Statistics. It includes all new and revised data available by the middle of the month of issue.

All series will be updated and revised as and when new information becomes available. In some cases, figures are rounded to the nearest digit where necessary, and hence the sum of the constituent items does not always agree with the total shown against them. A number of tables published previously have been replaced in this issue by tabulations on subjects not included earlier. The Table of Contents indicates in which issues, and pages, certain information has been included.

The classification used for the import-tabulations (Tables 23. b. and 23. c.) is published by this Office under the title 'Overseas Trade Classification 1977/8'. This, and other publications listed on the back of the Bulletin can be ordered from this Office.

Publication of this Bulletin is in accordance with the provisions of Public Law 7-37 and was made possible through the assistance provided by the United Nations' Department of Technical Cooperation and Development to the Statistics Division of the Office of Planning and Statistics.

Units of measurement

Throughout the Bulletin, metric units have been used where ever practicable. The following are approximate conversions of some units:

Weight:

1	ounce = 0.028350	kilogram = 28.350	gram
35.27396	ounce = 1	kilogram = 1,000	gram
1	pound = 0.453592	kilogram = 453.592	gram
2.20463	pound = 1	kilogram = 1,000	gram
1	short ton = 0.907184	metric ton = 907.184	kilogram
1.102311	short ton = 1	metric ton = 1,000	kilogram
1	long ton = 1.016047	metric ton = 1,016.047	kilogram
0.984207	long ton = 1	metric ton = 1,000	kilogram

Length:

1	inch = 2.54	centimeter = 0.0254	meter
0.3937	inch = 1	centimeter = 0.01	meter
1	foot = 30.48	centimeter = 0.3048	meter
3.28084	foot = 100	centimeter = 1	meter
1	yard = 91.44	centimeter = 0.9144	meter
1.093613	yard = 100	centimeter = 1	meter
1	statute mile = 1,609.344	meter = 1.609344	kilometer
0.621371	statute mile = 1,000	meter = 1	kilometer
1	nautical mile = 1,853.184	meter = 1.853184	kilometer
0.539612	nautical mile = 1,000	meter = 1	kilometer

Area:

1	square foot = 0.0929	square meter	
10.7639	square foot = 1	square meter	
1	acre = 0.4047	hectare = 0.004047	square kilometer
2.4710	acre = 1	hectare = 0.01	square kilometer
1	square mile = 259.0	hectare = 2.590	square kilometer
0.38610	square mile = 100	hectare = 1	square kilometer

Capacity:

1	gallon (U.S.) = 3.7854	liter
0.26417	gallon (U.S.) = 1	liter

Temperature:

° Celcius = $\frac{(^{\circ}\text{Fahrenheit} - 32) \times 5}{9}$
° Fahrenheit = $\frac{(^{\circ}\text{Celcius}) \times 9}{5} + 32$

Estimates are based on the 1973 Population Census. The cohort-component method of population projection is used to obtain the estimates (computer package program provided by the Population Council, New York).

The total Trust Territory population includes about two hundred persons in the 1973 Census whose district of residence was unknown. Therefore, the states do not exactly add up to the Total.

Estimates are based on the 1973 Population Census. The cohort-component method of population projection is used to obtain the estimates (computer package program provided by the Population Council, New York).

The total Trust Territory population includes about two hundred persons in the 1973 Census whose state of residence was unknown. Therefore, the states do not exactly add up to the Total.

a) Upto 1976 Kosrae rates are included within Ponape, but Kosrae and Ponape population numbers are given separately.
 b) Reported infant mortality is too low to calculate meaningful rates.

Definitions: Population = estimated mid-year population;
 Birth rate = number of live births per thousand population;
 Death rate = number of deaths per thousand population;
 Infant mortality = number of infant deaths (under 1 year of age) per thousand live births.

NOTE: The crude birth rates and partial infant mortality rates derived from the Population Census 1973 are included for comparison. The infant deaths reported in the 1973 Census relate to the deaths among the infants born during the preceding twelve months while infant mortality relates to the deaths among the infants under one year of age. The infant deaths reported in the 1973 Census therefore only represent part of the infant mortality, probably less than 75 percent of the latter. Comparison with the birthrates and infant mortality rates as reported for 1973 reveals striking differences for some states. When using birth and death data the degree of underreporting has to be taken into account. Underreporting most likely is random. Therefore percentage distribution of age-specific rates given in Tables 6 and 7 will correctly reflect the rates in the full population.
